features

Open the door  
to a better bathing experience

NOT ALL WALK-IN TUBS ARE CREATED EQUAL  
Safety Tubs®, the original inventor and manufacturer of the first acrylic walk-in bathtub, brings you innovative design and technology that makes it easy to get in and out of the bath and enjoy the comforts of bathing. Safety Tubs give you the freedom to enjoy luxurious bathing experiences – on your own – in safety, comfort and convenience.

#### SAFETY TUBS® FEATURES & OPTIONS

Safety Tubs® offers the most comprehensive features and options in the industry including:

- Patented T5™ Door System ensures watertight seal – Lifetime guarantee
- Premium hi-gloss acrylic or gelcoat construction
- Self-cleaning sanitary system
- Minute Drain™ water removal system
- Chromatherapy lighting system
- Aromatherapy fragrance system
- Soaker, Jet, Air or Dual massage systems
- Legs only massage that runs with tub half full
- Deluxe back jets for targeted relief
- Premium faucet with handheld shower

#### MINUTE DRAIN™ MEANS NO WAITING

Our patent-pending Minute Drain™ drains up to 8 times faster than regular drains which means no waiting to exit the tub.

multiple  
spa options

## Whirlpool Systems, Features & Options

#### HYDROTHERAPY

Once used only in health spas, warm whirlpool bath therapy is now a common and effective treatment for symptoms of arthritis, back pain and other common ailments. While soaking in warm water alone increases circulation and helps realize the relief of certain types of pain, the addition of a Massage System increases the overall health benefits of a warm bath.

#### PREMIUM JET SYSTEM WITH DELUXE BACK & LEGS ONLY MASSAGE

Tailor the effects of your whirlpool experience with the Deluxe Back and Legs Only Massage. Direct the flow of water solely to the well area of the tub to carefully massage your lower legs - this option works with the tub only half full, too. The Deluxe Back Massage consists of multiple, strategically positioned jets for the most comfortable and therapeutic lower back massage available.

#### FIVE STAR AIR BUBBLE SYSTEM

Send thousands of warm air bubbles bouncing throughout the tub to create a soft, full body champagne bath. Unlike most air systems, the Safety Tubs® Five Star Air Bubble System forces bubbles farther and deeper into the tub for an all over gentle massage experience.

#### DUAL MASSAGE

Combine the invigorating benefits of the Premium Jet System with the soothing touch of the Five Star Air Bubble System for the ultimate in hydrotherapy.

INDEPENDENCE. SAFETY. COMFORT. CONVENIENCE.
